Job Application for Data Scientist Intern

To whom it may concern,

My name is Yuepei Li, a third year PhD student majoring Computer Science at Iowa State University. I write this letter to ask for a summer intern on data scientist for 2021 or later potential position in your company. I learned this recruit from an email by David Fernández-Baca.

I think I am a good candidate for this position. First, three year systematic study about machine learning provide me right and abundant knowledge and skills, including machine learning models, programming languages and bio-information data(token) processing methods, to your team. Second, one year working experience at company iReader Inc. teaches me how to combine learned knowledges with industry projects, communicate with colleagues effectively and keep pushing projects to make progress. Finally, I am willing to this position. Always interested in and prepared to challenging tasks, I desire the chance to work in a creative and collaborative team with other excellent experts and researchers. I am sure it will be an important experience to me.

I upload my Resume and most of my information is there. If you want know me more, please feel free to contact at your convenient time.

Sincerely,

Yuepei Li
